IBM® Sterling Selling and Fulfillment Foundation Process Modeling

Durata: 1 gg

Descrizione

This 1-day instructor-led course provides students with an understanding of how to configure the Process Modeling module of Application Platform. This course is primarily designed for Hub administrators of IBM® Sterling Selling and Fulfillment Foundation.

This course begins with an overview of Process Modeling features, including how to set up a business process workflow for an organization. Students are then introduced to Statuses, Conditions, and other components of a process pipeline. The course then describes how to create a process pipeline.

Objectives: •Describe Process Modeling

- List the business process components
- Extend the following components:
 - Conditions
 - Services
 - Events and Event Handlers
 - Actions
 - Transactions
- Create Pipelines and Pipeline Determination Rules

A chi è rivolto?

This intermediate course is designed to train Hub administrative users to create and configure process pipelines.
