

AN202G

Korn and Bash Shell Programming

Durata: 5 gg

Descrizione

This course will teach you how to use shell scripts and utilities for practical system administration of AIX (or other UNIX) operating systems.

Objectives: After completing this course, you should be able to:

- Distinguish Korn and bash shell specific features
- Use utilities such as sed and awk to manipulate data
- Understand system shell scripts such as /etc/shutdown
- Write useful shell scripts to aid system administration

A chi è rivolto?

This course is for support staff for AIX on POWER systems

Prerequisiti

You should have:

- An understanding of programming fundamentals: variables, flow control concepts such as repetition and decision.
 - A working knowledge of AIX including the use of the vi editor, find and grep commands.
- Students without this experience should attend AIX Basics (AN10G).

Contenuti

- Basic shell concepts
- Flow control in a shell Script
- Functions and typeset
- Shell features such as arithmetic and string handling
- Using regular expressions
- Using sed, awk and other AIX utilities
